

IN THE SPECIFICATION:

Supplemental to the amendments made to the specification in the June 22, 2005 Amendment, April 19, 2006 Preliminary Amendment and January 16, 2007 Amendment, please replace the Summary of Invention section on page 4, line 2 through page 4, line 4 with the following amended section:

-- It is an object of the present invention to enable, without depending on an arrangement or a command for moving to a low electric power consumption state, a wireless connection process portion to be put into a low electric power consumption state and the wireless communication traffic to be reduced.

It is another object of the present invention to reduce the limitation of wirelessly performing other services with other apparatuses inside the same piconet and the electric power consumption at a stand-by time.

It is one aspect of the invention to provide a communication apparatus, including a wireless communication portion configured to wirelessly communicate with another communication apparatus, wherein ~~said the~~ wireless communication portion has an active wireless communication mode and a power save wireless communication mode, a change portion configured to change the wireless communication mode of ~~said the~~ wireless communication portion, and a display portion configured to display information about the wireless communication mode in accordance with the change of the wireless communication mode by ~~said the~~ change portion.

Still other objects and features of the present invention will be evident from the following specification and the drawings.--
